Professional Summary

Computer Science and Engineering graduate with experience in industrial data analysis, operational reporting, and Python-based data processing. Skilled in Python, SQL, MySQL, Pandas, NumPy, Excel, and data visualization, with additional experience in machine learning, NLP, and open-source contributions. Published research at IEEE ICICNIS 2025.

Education

Vellore Institute of Technology, Bhopal — Aug 2022 – Apr 2026
B.Tech in Computer Science and Engineering (CGPA: 8.79/10) — *Bhopal, Madhya Pradesh*

Shri. Baleshwar Jr. College — June 2021 – July 2022
Higher Secondary Certificate (HSC) – 82.7% — *Ahmednagar, Maharashtra*

B.G.P. Sahyadri Vidyalaya — June 2019 – July 2020
Secondary School Certificate (SSC) – 93.6% — *Ahmednagar, Maharashtra*

Experience

Data Analyst Intern — Jul 2025 – Dec 2025
Prathamesh Transformers — *Sangamner, Maharashtra*
Technologies: Python, Pandas, NumPy, Excel

- Analyzed operational and production datasets to support inventory management and production planning.
- Cleaned, organized, and processed raw data to prepare analytical reports and visual dashboards for management decision-making.
- Collaborated with the production team to identify data-related issues and support improvements in operational workflows.

Projects

IoT-Integrated Smart Medication System Using Machine Learning — Apr 2025
Python, TensorFlow/Keras, CNN, NumPy, Pandas

- Developed a CNN-based machine learning prototype to process symptom-related inputs across 14 symptom categories and generate medication suggestions.
- Built data-preprocessing pipelines to clean and structure symptom data for model training using Python and Pandas.
- Designed software logic for a digital healthcare assistant intended for rural contexts, integrating machine learning concepts into an IoT-based medication system.

MovieMatch – NLP-Based Movie Recommendation Engine — Aug 2024
Python, NLTK, Pandas, Streamlit

- Developed a content-based recommendation engine analyzing 5,000+ movie records, achieving highly relevant Top-10 user suggestions through cosine similarity.
- Applied NLP preprocessing techniques, including tokenization and stemming, to process movie metadata.
- Built an interactive Streamlit interface to let users explore movies and receive recommendations based on content similarity.

Open-Source Contributions

Open-Source Contributor – GirlScript Summer of Code — Jun 2024 – Oct 2024
GirlScript Foundation — *Remote*

- Contributed to 12+ open-source repositories by optimizing Python scripts and resolving logic-based issues.
- Used Pandas and NumPy for data processing and collaborated through Git/GitHub, including branching and conflict resolution.
- Improved project documentation and enhanced automation scripts to support contributor onboarding.

Technical Skills

Programming: Python, HTML, CSS
Databases: SQL, MySQL
Data Analysis: Pandas, NumPy, Matplotlib, Excel, Data Cleaning, Exploratory Data Analysis, Data Visualization
Machine Learning and Natural Language Processing (NLP): TensorFlow, Keras, CNN, Text Preprocessing, Tokenization, Stemming, Cosine Similarity
Frameworks: Streamlit, Flask, FastAPI
Tools and Cloud: Git, GitHub, AWS

Achievements & Certifications

- Research Publication: "IoT Integrated Smart Medication System Using Machine Learning for Enhanced Rural Healthcare," IEEE ICICNIS 2025.
- AWS Academy Cloud Foundations – Ethnus, Apr 2025.
- Generative AI with IBM watsonx – IBM, Apr 2025.
